DORSETT

Dorsett has that delicious, rich, dessert flavor that places it above all others excepting Fairfax, making it a prime favorite for home gardens. Berries are bright, snappy red, large and perfectly formed, ripen evenly and are firm throughout. They stay bright and firm several days after picked. Dorsett is an early Strawberry that produces enormous loads of perfect fruit. Plants are hardy and thrifty growers that make heavy picking rows. Will stand up and produce under both very dry and extremely wet conditions. Yields of 10,000 to 12,000 qts. per acre often reported—you can do as well!
